- Work in the requirements stage, UX and UI design, and creation of Wireframes, mockups, and layout the different projects.

Technology Instructor and Manager - Colegio Boston

From June 2008 to June 2011

I worked as an instructor of web technologies and as a manager of the academic department. I directed a teaching team of about 20 professors, I developed academic programs focused on technology which gave significant economic growth to the company. I also participated in radio and television commercials where we promoted the different technical programs that I developed.
